

Beautiful Results Without the Sensitivity

HURRISEAL®

DENTIN DESENSITIZER

HurriSeal® Dentin Desensitizer

is a simple, one-step, chairside procedure for treating and preventing dentinal hypersensitivity. HurriSeal's unique HEMA, Sodium Fluoride and Benzalkonium Chloride formula acts in seconds to seal dentinal tubules.

TREAT SENSITIVITY

Treat cervical sensitivity and provide immediate relief lasting up to 9 months.

PREVENT SENSITIVITY

Prevent post-procedure discomfort associated with restorative procedures. Just a quick application after etching is all you need to prevent sensitivity for the lifetime of the restoration.

RESTORATIONS

Not only does HurriSeal act as a wetting agent, but it also increases the bond strength under restorations.*

EFFECTIVE

HurriSeal offers chairside relief with only a quick 30-second application.

EASY TO USE

No mixing or light-curing. Just a quick and simple chairside application with instant results.

SOFT TISSUE FRIENDLY

Unlike products containing glutaraldehyde, HurriSeal is gentle to soft tissue and does not cause gingival irritation when used as directed.

In-office application of a desensitizing agent is an ADA recognized procedure.

Simply use insurance code D9910 for reimbursement of HurriSeal application.

After only a few applications, HurriSeal pays for itself!
