

CEO-TWO[®]

Laxative Suppositories

*CO₂ Releasing Laxative Suppository
Works Within 30 Minutes!*

OTC

CEO-TWO[®] Laxative Suppositories combine Sodium Bicarbonate and Potassium Bitartrate in a Polyethylene Glycol Base. Upon insertion into the rectum, the pre-moistened suppository reacts with the moisture present to produce carbon dioxide gas. This CO₂ gas gently expands the lower bowel and creates a reflex stimulation resulting in an urge to empty the lower bowel within 30 minutes. Moreover, there is no chemical stimulation to the bowel, no painful cramping, no diarrhea and rarely a second urge to defecate.

Bowel regularity is no accident with CEO-TWO Laxative Suppositories!

- Water-soluble formula
- Self-lubricating
- No refrigeration necessary – perfect for travel
- Individually wrapped and easy to open
- Unique tapered shape makes retention easier, providing satisfactory results every time
- Comfortably empties the last 25 cm of the lower bowel within 30 minutes
- Does not cause irritation or cramping, unlike stimulant laxative products
